Friday, April 19th 2013
Pullman Hotel, Bucharest World Trade Center

Hands-on Workshop: Vascular assessment in CKD patients
Organized with support from RENART Project team

15.30-18.30 Part 1: Doppler ultrasound for vascular access in hemodialysis

- 15.30 Vascular access planning – factors influencing vascular access selection (D. Zilisteanu)**
- 15.40 Anatomy of vascular access – importance of preoperative mapping (Isabella Oprea)**
- 15.55 Ultrasound in vascular access assessment and surveillance (Adina Stoica)**
- 16.15 Doppler ultrasound for diagnosis of complications in HD fistulae (Ileana Arsenescu)**
- 17.00 Hands-on: performing Doppler ultrasound in AV fistula**

18.30-19.30 Part 2: The assessment of arterial stiffness in CKD patient

- 18.30 The assessment of arterial stiffness by Sphygmocor (Monica Ecobici)**
- 19.00 The assessment of arterial stiffness by ultrasonography (Monica Rosca)**

RENART Project: Grant no. 93/2012

Funding: The Executive Agency for Higher Education, Research, Development and Innovation

Project Director: Prof. Dr. Mihai Voiculescu

Partners:

- Coordinator: Fundeni Clinical Institute, Center of Internal Medicine and Nephrology Fundeni
- Partner 1: „Victor Babes” National Institute for Research and Development in Pathology and Biomedical Sciences
- Partner 2: “Prof. Dr. CC. Iliescu” Institute of Cardiovascular Diseases
- Partner 3: Institutul pentru Tehnica de Calcul SA
